### **DETAILED ACTION**

1. Claims 1-83 are presented for examination.

A telephone call was made to applicant's representative, David L. Feigenbaum, Reg. 30,378 on October 10<sup>th</sup>, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

### ***Election/Restrictions***

2. Restriction to one of the following invention is required under 35 U.S.C. 121

- I. Claims 1-61 and 68-83 are drawn to concurrency access by multiples processors, which is classified in Class 707, subclass 8.

- II. Claims 62-67 are drawn to queue data structure, which is classified in Class 707, subclass 102.

3. Inventions I and II are related as subcombinations disclosed as usable together a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is drawn to concurrency access to the regions of the database by multiple processors. The queue data structure in the invention II is utilized to control the writing process to rows and columns. See M.P.E.P 806.05(d)

4. Because of the inventions are distinct for the given reasons and have acquired in a separate status in the art as show by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

6. Application is reminded that upon cancellation of claims in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventor is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must by accompanied by a diligently-file petition under 37 C.F.R 1.48(b) and by fee required 37 C.F.R. 1.17(h).
